Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Page 2

1. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 1, the claim is in definite as being incomplete for omitting essential elements. The recitations in the claim are clearly not sufficient to support a carry look-ahead circuit. It is unclear how a look ahead carry is generated. See MPEP § 2172.01. Claims 2 also have the same problems.

As per claim 3, the recitations in the claim vague and indefinite as being totally not understood. Thus, it is indefinite as to what applicant regards as the invention. These unclear recitations are also found in claim 8.

As per claim 6, it unclear what it means by the recitation "exclusive OR of the positions", line 5, "AND of the positions", line 7. "the carry propagation signal", line 6, "the carry generation signal", lines 7-8, lack proper antecedent basis. On line 13, "exclusive OR for" should be - - exclusive OR of - -. Claim 7 also has the same problems.

It should be noted that either underlines or brackets but not both should be used to indicate deletions in an amendment. Using both may cause confusion.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,2,6 and 7 are rejected under 35 U.S.C. 102(b) as being clearly by clearly anticipated by Edmondson (5,278,783).

Edmondson disclose in figure 12 an adder including an adder that contains at least one carry look-ahead circuit having a first logic operation circuit (ROW 1 of PG CELLs, see also figure 2A) for generating carry propagation signals and carry generation signals, a second logic operation circuit (ROW 2 and 3) for generating carry signals, and a third logic operation circuit (ROW 4, see also figure 10) for generating the result of addition of each position. The second logic operation circuit clearly contains at least one carry look-ahead circuit composed of at least one first logic gate, which outputs AND, NAND, OR or NOR of input 2-bit signals (see figures 3-9), at least one second logic gate, which output OR or NOR of AND of 2-bit signals among input 3-bit signals and the other 1-bit signal, or AND or NAND of OR of 2-bit signals among input 3-bit signals and the other 1-bit signal (see figures 3-9), and at least one third logic gate that output NOT of an input 1-bit signal (see figures 7 and 9) as claimed.

- 4. Due to the uncertain nature of claims 3 and 8 as set forth above in the rejection under 35 U.S.C. 112, second paragraph, claims 3-5 and 8-10 cannot be compared to the prior art at this time.
- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
